Software developer/programmer

Results-driven IT professional with great analytical, technical and interpersonal skills, with extensive experience in developing, programming, testing, deployment and maintenance of custom made and off-the-shelf software systems. Experience also covers research and justification of business cases and creation of "proof of technology" solutions.

Up-to-date on IT developments, early implementer of new software (Hyper-V, Windows 7).

I enjoy cooperating on projects that are challenging, innovative and employ the latest concepts/designs/technologies.

Government of Canada Security Clearance level: **Secret**

Professional Experience

IT Consultant (.NET and BizTalk)
Freelance, Canada

2008-present

- Developed and tested a .NET/BizTalk solution to integrate Enterprise Resource Planning system with Warehouse Management System and third party warehousing systems (using EDI), to control the warehousing, receiving and shipment processes for four different warehouses.

IT Consultant

2003-2008

Freelance, in Barbados and Ukraine (while accompanying my wife who works for DFAIT on two diplomatic postings)

- Maintained and developed Go2Kiev CMS web site (www.go2kiev.com).
- Developed web pages for luxury villa renters, International Women's Club of Kyiv, Embassy of Indonesia in Ukraine and few others (using Open Source Code CMS).
- Helping diplomats and expatriates (in Barbados and Ukraine) with a range of computer related problems.
- Consulted on various projects for the University of the West Indies School of Clinical Medicine and Research at the Queen Elisabeth Hospital in Barbados.
- Private tutoring to individuals and groups (up to 20 people).
- Updated and maintained an Excel macro program for salary calculations for accountants in Embassy of Canada in Ukraine.

Tutorial and manual writer

2000-2003

Pro-mil d.o.o., Croatia

- Developed tutorials for software "Photoshop 6.0 and 7.0", "Adobe Acrobat Reader 5.0", "Visual Basic for Applications", "XML 3.0 and 4.0" and "Corel Draw" which were produced in several formats like Internet, educational CD's and books.

Information Technology Manager

2000-2001

Varazdin Stock Exchange, Croatia

- Developed very successful program (in terms of popularity and generated revenue) for the general public that was generating real time trading reports on Internet.
- Developed programs to help Croatian Securities Agency to analyze potential inside trading and similar irregularities.
- Maintained office network (Intranet and Internet) with 2 servers, 10 local workstations and 40 remote dial-up workstations (later upgraded to ISDN connections).
- Maintained two Oracle databases (backup, analysis of data, design of new functionalities).
